Confirmation of award of the QSI Quality Mark

Dear Kate,

We are pleased to confirm that Teleconsult Ltd has been awarded the Quality Standard for Imaging (QSI) Quality Mark, as of 4th March 2026 following assessment against the QSI 2024 standards.

The QSI Quality Mark is awarded as part of a three-year cycle and will expire on 4th March 2029. Full details of the cycle and compliance process are outlined in the QSI Handbook. Your next assessment will be a year 2 remote review next year. Specific dates for the review will be discussed with you by a Quality Review Partner nearer the time.

On behalf of The Royal College of Radiologists and The College of Radiographers we would like to congratulate you and your colleagues on achieving the QSI Quality Mark. We recognise the hard work and collective effort of the whole imaging service that goes into attaining this. The skill and professionalism that radiologists, radiographers and other clinical, technical and support staff bring to delivering crucial imaging services for the benefit of patients is of vital importance. We trust that the outcome will help you to promote and enhance patient confidence in your imaging services, maintain staff wellbeing and retention and support the delivery of high quality, efficient and effective services to patients.

We would very much like to promote your achievement via our websites and communications channels. We would also like to explore sharing your experience of the process and highlighting your areas of good practice. A member of the QSI team will be in touch to explore this further with you and your team.

Please share this message with your colleagues and once again many congratulations.

Yours sincerely

Dr Stephen Harden

President RCR
